PROFILE SUMMARY

Cloud architect and solutions consultant with 11+ years spanning IT operations, infrastructure, and cloud transformation. Holds 8 Microsoft Azure certifications (6 active), including Expert-level Solutions Architect. Served as the primary US delivery resource for a Microsoft Copilot enablement program, training 2,574+ professionals across banking, healthcare, government, education, and manufacturing in a single year at 136% of target. Founder of ARC Cloud Consulting, delivering cloud architecture, custom software, and AI automation for businesses across the Caribbean and beyond, and co-founder of 3 Stripes Technologies, a purpose-built EMR platform serving regional healthcare. Proven across Azure architecture, migrations, security, and AI adoption — equally comfortable designing the infrastructure and driving the human adoption that makes it deliver.

July 2021

Microsoft AZ-900

Azure Fundamentals

March 2021

Google Cloud Platform

Industrial IoT Fundamentals

October 2020

Caribbean Examinations Council (CXC)

6 O levels Passes

2014

WORK EXPERIENCE

ARC Cloud Consulting

Founder & Technical Lead

2023 – Present

- Founded and operate a remote-first cloud consulting practice combining Azure architecture with a distributed team covering full-stack development, UX/UI design, and n8n automation.
- Architected and delivered the SASSI logistics platform — 200+ active users in production, valued at \$70,000–\$90,000 USD — including WhatsApp automation and AI-powered support ticketing.
- Delivered a full digital transformation for an industrial engineering client: n8n automation across sales, marketing, and operations, an AI voice-calling system, and a 30+ page web platform.
- Designed and implemented Microsoft 365 identity federation (SAML 2.0 SSO), Intune endpoint management, and licensing architecture for corporate clients.
- Operate as an embedded technical partner on retainer accounts — owning scoping, architecture, delivery, and coordination of a team across three countries.

3 Stripes Technologies

Co-Founder & Technical Director

2020 – Present

- Co-founded a cloud-based Electronic Medical Records platform purpose-built for Caribbean healthcare providers.
- Architected the current V3 platform: Turborepo monorepo, TypeScript end-to-end, NestJS, React 19, Drizzle ORM, PostgreSQL, BullMQ, and Azure infrastructure with CI/CD via GitHub Actions.
- Resolved a critical performance issue loading 7,000+ patient records client-side, implementing server-side pagination that cut load times from 5–10 seconds to under one second.
- Deployed Azure Front Door as a WAF layer after bot traffic spiked server CPU to 80–100%, reducing sustained resource usage to 30–40%.
- Platform runs a live practice near-paperless: 11 doctors, 7,000+ patient records.

Apeiron Sumus / Microsoft

- Solutions Assessment Consultant & Copilot Delivery Lead
- March 2024 – June 2026
- Served as the primary - and for most of FY26, the sole - US delivery resource for Microsoft's M365 Copilot workshop program within the SMB Solution Assessment team.
 - Completed 95 customer engagements in FY26 at 136% of annual target, training 2,574+ professionals across banking, healthcare, government, education, manufacturing, hospitality, legal, and nonprofit sectors.
 - Delivered to audiences ranging from 3 to 320+ attendees - single sessions, multi-session series, and full programs — adapting content to each organization's readiness and goals.
 - Designated internal Tech Expert for tool-based assessment escalations across the North American consultant team, supporting CSAT, Azure Advisor, and related Microsoft platforms.
 - Delivered the full assessment portfolio: Azure Advisor cloud optimization, Cloud Security (CSAT), Azure Migrate, Total Cost of Ownership and Business Value Assessments, and Threat Protection Assessments.
 - Earned 10 unsolicited customer accolades for delivery quality and adaptability, including direct feedback from a banking CIO.

Digicel Group

- Group Azure Cloud Administrator
- April 2023 – February 2024
- Supported Azure cloud operations across the Caribbean, providing real-time monitoring of deployed services.
 - Managed virtual machines and performed daily maintenance, patching, and upgrades through Azure portals.
 - Went technically deep across Azure services to resolve customer needs and communicated emerging trends to leadership.
 - Monitored performance and utilization, ensuring VM optimization and uptime through workload monitoring.
 - Identified and resolved application instability, implementing corrective actions with minimal downtime.
 - Controlled infrastructure costs by right-sizing servers and services.
 - Contributed to cloud strategy, adoption, and governance, ensuring system security through best practices and audits.

PBS Technologies (Trinidad) Limited

- Systems and Network Administrator
- January 2021- March 2023
- Conducted assessments and made recommendations for disaster recovery, remote access, network appliances, servers, and directory services security.
 - Monitored servers and escalated emergency technical issues to maintain optimum uptime.
 - Reduced and controlled expenses through cost, schedule, and contract performance analysis and improved resource allocation.
 - Developed strategies, budgets, and deployment plans to inform and influence management and stakeholders.
 - Managed application patches, data backup, security changes, and network configuration; replaced hardware and deployed and tested software applications.
 - Monitored network capacity and performance; diagnosed and resolved complex network problems.
 - Installed, configured, and managed Windows Servers and troubleshoot Windows-based software.
 - Developed network engineering solutions for clients from concept through implementation, presenting findings to client managers and engineers.

PBS Technologies (Trinidad) Limited

- NOC Technician & Engineer
- September 2019 – January 2021
- Managed node monitoring and escalation across client network infrastructure, ensuring issues were triaged and routed for resolution within SLA.
 - Used SolarWinds heavily for network performance monitoring, alerting, and diagnostics across the managed environment.
 - Analyzed, monitored, and provided recommendations on emerging network technologies.

AREA OF EXPERTISE

- | | | |
|------------------------------------|--|-----------------------------------|
| ▪ Azure Solutions Architecture | ▪ Microsoft Intune Endpoint Management | ▪ NestJS · React · TypeScript |
| ▪ AI Adoption & Copilot Enablement | ▪ Solution Assessments (CSAT, Azure Migrate) | ▪ PostgreSQL · SQL |
| ▪ Cloud Migration | ▪ Infrastructure as Code | ▪ CI/CD (GitHub Actions) |
| ▪ Modernization | ▪ n8n & Workflow Automation | ▪ Technical Training & Enablement |
| ▪ Microsoft 365 & Entra ID | ▪ Azure Front Door / WAF / CDN | ▪ Remote Team Leadership |
| ▪ Azure Security & Governance | ▪ Cost Optimization & TCO/BVA | ▪ Client & Stakeholder Management |
| ▪ SAML 2.0 Identity Federation | | |
