ANTONIO CUMBERBATCH

Cloud Solutions Architect | Automation & Integration | Technical Delivery

Trinidad & Tobago (1868)-323-7810 antonio.cumberbatch2@gmail.com

PROFILE SUMMARY

Cloud solutions architect and technical delivery consultant with 11+ years across IT operations, infrastructure and cloud transformation. Combines Azure architecture, Microsoft 365, workflow automation and custom application delivery with client-facing consulting and technical enablement. Served as the primary US delivery resource for a Microsoft 365 Copilot enablement programme, training 2,574+ professionals across multiple industries. Through ARC Cloud Consulting and 3 Stripes Technologies, leads solution scoping, architecture and delivery coordination for cloud-based business systems across logistics, industrial operations and healthcare.

WORK EXPERIENCE

ARC Cloud Consulting

Founder & Technical Lead — 2023 – Present

- Founded and operate a remote-first cloud consulting practice combining Azure architecture with a distributed team covering full-stack development, UX/UI design, and n8n automation.
- Architected and delivered an Azure-hosted logistics platform supporting 200+ active users, bringing customer tracking, invoicing, payments and administrative workflows into one system..
- Designed and delivered n8n workflows for an industrial engineering client's sales, marketing and operations teams, automating customer follow-ups, response logging and handover to the responsible staff member.
- Designed and implemented Microsoft 365 identity federation (SAML 2.0 SSO), Intune endpoint management, and licensing architecture for corporate clients.
- Operate as an embedded technical partner on retainer accounts — owning scoping, architecture, delivery, and coordination of a team across three countries.

3 Stripes Technologies

Co-Founder & Technical Director — 2020 – Present

- Co-founded a cloud-based Electronic Medical Records platform purpose-built for Caribbean healthcare providers.
- Architected a cloud-based EMR platform using React, TypeScript, NestJS and PostgreSQL, with background job processing and automated deployment to Azure through GitHub Actions. Resolved a critical performance issue loading 7,000+ patient records client-side, implementing server-side pagination that cut load times from 5–10 seconds to under one second.
- Deployed Azure Front Door as a WAF layer after bot traffic spiked server CPU to 80–100%, reducing sustained resource usage to 30–40%.
- Platform runs a live practice near-paperless: 11 doctors, 7,000+ patient records.

Apeiron Sumus

Solutions Assessment Consultant & Copilot Delivery Lead — March 2024 – June 2026

- Served as the primary US delivery resource—and, for most of FY26, the sole US delivery resource—for the Microsoft 365 Copilot workshop programme within Apeiron Sumus's SMB Solution Assessment team. Completed 95 customer engagements in FY26 at 136% of annual target, training 2,574+ professionals across banking, healthcare, government, education, manufacturing, hospitality, legal, and nonprofit sectors.
- Delivered Copilot workshops to audiences ranging from 3 to 320+ attendees, adapting single sessions, multi-session series and full programmes to each organisation's readiness and goals. Designated internal Tech Expert for tool-based assessment escalations across the North American consultant team, supporting CSAT, Azure Advisor, and related Microsoft platforms.
- Delivered the full assessment portfolio: Azure Advisor cloud optimization, Cloud Security (CSAT), Azure Migrate, Total Cost of Ownership and Business Value Assessments, and Threat Protection Assessments.
- Earned 10 unsolicited customer accolades for delivery quality and adaptability, including direct feedback from a banking CIO.

Digicel Group

Group Azure Cloud Administrator — April 2023 – February 2024

- Supported Azure cloud operations across the Caribbean, providing real-time monitoring of deployed services.
- Managed virtual machines and performed daily maintenance, patching, and upgrades through Azure portals.
- Went technically deep across Azure services to resolve customer needs and communicated emerging trends to leadership.
- Monitored performance and utilization, ensuring VM optimization and uptime through workload monitoring.
- Identified and resolved application instability, implementing corrective actions with minimal downtime.
- Controlled infrastructure costs by right-sizing servers and services.
- Contributed to cloud strategy, adoption, and governance, ensuring system security through best practices and audits.
- Monitored network capacity and performance; diagnosed and resolved complex network problems.
- Installed, configured, and managed Windows Servers and troubleshot Windows-based software.
- Developed network engineering solutions for clients from concept through implementation, presenting findings to client managers and engineers.

PBS Technologies (Trinidad) Limited
Systems and Network Administrator — January 2021- March 2023

- Conducted assessments and made recommendations for disaster recovery, remote access, network appliances, servers, and directory services security.
- Monitored servers and escalated emergency technical issues to maintain optimum uptime.
- Reduced and controlled expenses through cost, schedule, and contract performance analysis and improved resource allocation.
- Developed strategies, budgets, and deployment plans to inform and influence management and stakeholders.
- Managed application patches, data backup, security changes and network configuration; replaced hardware and deployed and tested software applications.

PBS Technologies (Trinidad) Limited
NOC Technician & Engineer — September 2019 – January 2021

- Managed node monitoring and escalation across client network infrastructure, ensuring issues were triaged and routed for resolution within SLA.
- Used SolarWinds heavily for network performance monitoring, alerting, and diagnostics across the managed environment.
- Analyzed, monitored, and provided recommendations on emerging network technologies.

EDUCATION AND QUALIFICATIONS

Microsoft AZ-305
Azure Solutions Architect Expert — May 2024

Microsoft AI-900
Azure AI Fundamentals — March 2024

Microsoft AZ-700
Azure Network Engineer — June 2023

Microsoft AZ-500
Azure Security Engineer — April 2023

Microsoft AZ-104
Azure Administrator — April 2022

Installation, Storage and Compute with Windows Server 2016 (M20740)
Credentials ID: CGKSQ1495887 — July 2021

Microsoft AZ-900
Azure Fundamentals — March 2021

Google Cloud Platform
Industrial IoT Fundamentals — October 2020

Caribbean Examinations Council (CXC)

- 6 O levels Passes

AREA OF EXPERTISE

- **Cloud Architecture:**
- Azure solution design,
- Cloud migration,
- Infrastructure monitoring
- Cost optimisation.

- Identity & Security:.

- Microsoft 365, Entra ID, Intune, SAML 2.0 federation and Azure Front Door/WAF

Workflow Automation: n8n, automated customer follow-ups, response logging and human handover.

Consulting & Enablement: Solution assessments, Microsoft 365 Copilot training and stakeholder communication.

Technical Delivery: Solution scoping, remote team coordination, infrastructure as code and CI/CD with GitHub Actions.

Applications & Integration: TypeScript, React, NestJS, PostgreSQL and API integrations.
